CONFERRING OF DEGREES IN COURSE

THE Rice Institute has never conferred an honorary degree. The degrees about to be conferred are earned degrees. These degrees are awarded by authority of the State of Texas given to the Trustees. They are conferred on recommendation of the Faculty, and in the procedure the Secretary of the Faculty will introduce the candidates, the Bursar will act as marshal, the hoods will be invested by the Dean, and the diplomas received from the Registrar.

Under the accelerated programme induced by the national emergency, many members of this class, on completion of the requirements for their respective degrees, have already been inducted into war service and are unable to return for this ceremony. They are granted their degrees at this time *in absentia*.
